The U.S. lift Truck division situated in Cleveland has a professional team experienced in Sales, Purchasing, Advertising, Logistical and Technical Support.

Korea's original domestic forklift marketplace was an open-import enterprise. In the 1960's, Korea Machinery Co. Ltd. begun to import assembled forklifts as part of a national equipment expansion project. Initial product sales of this manufacturing equipment focused on large business communities, the armed services and on state-run corporations. This eventually led to a merger with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division commenced business operations throughout Korea to service and sell this heavy equipment. By 1978, a forklift production plant was successfully completed. Continuous technical education became the new focus for enhancing quality and product development.

Domestic lift truck trade for Daewoo started in 1967 and grew to an astounding 90% market share in Korea. By the 1980's, Daewoo's sophisticated technological enhancements combined with sales success placed them in a situation of substantial growth of their lift truck business.

In 1981, Caterpillar Industrial Inc. of the United States, proposed a joint venture project to counter act competitive pressures in the US materials handling industry. This project drastically expanded Daewoo's forklift sales. Construction was completed in 1984 to facilitate a contemporary plant which helped launch the business for the fabrication of high added-value goods suited for export. In 1993, the company had a global sales system and started exporting models they had established through in-house expertise, as an independent product. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing expansion opportunities into international marketplaces.
