

Aerial Work Platforms

Aerial Work Platform - There are a lot of accessories for lift trucks which could be used to be able to help expand the functionality of your forklift and allow you to lift stuff, handle materials with greater ease or to complete clean-up tasks.

Some attachments were specifically designed for the forks themselves. For instance, fork extensions could be utilized if you require more blade length, that increases lifting capacity. Fork extensions come in lengths ranging from forty eight to one hundred twenty inches. Triangular or rounded accessories are one more variety utilized if transferring rolled material to be able to make sure it does not roll off of the standard flat forks.

Lifting attachments could be pivoting and telescoping crane accessories. They come in various kinds. These attachments are usually used for transferring poles, lumber, metal bars or whichever kind of bulky objects. Other attachments like for example different kinds of hook plates and hooks are presented in order to lift items utilizing a chain or sling. Magnetic lifters and slab lifters are other objects that can be utilized along with hook accessories. Slab lifters are specialized accessories that are utilized for lifting different materials that are delivered in a slab or sheet format. Rug rams or carpet poles are other lifting tools that connect to your lift truck so as to make moving rolls of carpet easier. The accessory connects onto the lift truck's blades and has a pole which goes through the middle of the carpet roll.

There are many other types of forklift attachments that could be designed for facility maintenance like for instance snow forks. These forks connect to front end loaders and can transport materials like for example snow, dirt and soil. Other common cleanup accessories comprise standard sweepers and magnetic sweepers. Standard sweepers includes a broom that the lift truck blades connect onto for sweeping big spaces like for example warehouse, factory floors and parking lots. The magnetic sweeper is the same except that it has a magnetic plate instead of bristles. The magnetic sweeper is used in places where there is lots of metal debris such as on shop floors for instance. Sweepers have widths as much as 60 inches and this surface area makes clean up simple and fast.

Material spreaders are other attachments used on forklifts. These spreaders are useful for a variety of applications like for instance spreading fertilizers, insecticides, seeds, ice melt, rock salt and pellets.

Work platforms are another optional lifting attachment that lots of companies make use of day after day. The platforms range in size from 36" x 36" to up to 60" x 60". There are several models existing that are capable of folding up and storing into a smaller space. Work platforms are designed to raise workers up to an overhead location utilizing the lift truck. Larger platform models have additional space for workers to be able to carry tools and other necessary stuff meant for the job. Often work platforms are constructed of steel or ploy material.
